The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application.

FCF was written with one strongly held principle in mind: Corporate Finance should be developed in terms of a few integrated, powerful ideas. RWJ took a hard look at what was truly important and useful; in doing so, they eliminated topics of dubious relevance, downplayed purely theoretical issues, and minimized the use of extensive and elaborate calculations to illustrate
