The formula defines the energy E of a particle in its rest frame as the product of mass m with the speed of light squared (c^2). Equivalently, the mass of a particle at rest is equal to its energy E divided by the speed of light squared (c^2). Because the speed of light is a large number in everyday units (approximately 3×10^8 meters per second), the formula implies that a small amount of ...

In physics (in particular in statistical mechanics), the Maxwell-Boltzmann distribution is a particular probability distribution named after James Clerk Maxwell and Ludwig Boltzmann.. It was first defined and used for describing particle speeds in idealized gases, where the particles move freely inside a stationary container without interacting with one another, except for very brief ...
